

Dell Micro-portable Projectors 1100MP, 2300MP, 3300MP and 4100MP

Dell | Projectors

**Great things come in small packages,
and they keep getting better.**

Dell 1100MP Projector

Whether for business, education or personal use, Dell™ projectors offer great performance at an affordable price. They are packed with the latest technology and include all the extras as standard, so you have everything you need to get up and running, right out of the box – custom-fitted hard-shell carrying case, remote control and data/video cables.

Deliver bright, clear images

Dell projectors use advanced DLP™ (Digital Light Processing™) technology from Texas Instruments to achieve great picture quality in a small and light form factor. They combine consistent brightness and high contrast ratios to produce clear, sharp video and text images. With integrated digital keystone correction and zoom capabilities, you can adjust the projector for optimal viewing in almost any situation. Dell offers a choice of native resolutions so you can select the projector to match your user needs and budget.

Outstanding ease of use

Dell Projectors are extremely easy to use. With support for a wide range of video and television input sources and video standards, you get great presentation flexibility. Featuring automatic synchronisation, the projector automatically detects the type of input and changes its settings accordingly. This plug-and-play technology makes the projectors compatible with most computers, including Dell Latitude™ and Inspiron™ notebooks – just follow the simple Quick Set Up guide and you're ready to go.

Excellent mobility features

Dell projectors are small and light – they weigh less and are more portable than many notebook computers. They're built for durability, with a sturdy magnesium casing and include a custom-fitted, hard-shell carrying case, making travelling light and easy. With desktop or ceiling mount capability and front and rear projection, you can use these projectors just about anywhere.

Perfect for work and entertainment

Dell projectors have enough performance features to be your workhorse during the week, and entertainment partner over the weekend. Compliment your home entertainment system by watching movies, sporting events, viewing photos or even playing video games on the big screen.

Great value is a given – it's from Dell!

Like all Dell products, Dell projectors maximise price and performance, while being affordably priced and backed by Dell service and support. Valuable extras, such as a carrying case and remote control, are included at no extra charge.
